#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
  - i. Regarding claim 5, the phrase "cork-like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "-like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

# Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-4 and 7-11 rejected under 35 U.S.C. 102(b) as being anticipated by Frechtmann.

Application/Control Number: 10/076,286

Art Unit: 3724

Frechtmann discloses a blade guard comprising all the elements claimed including, inter alia, a flexible and resilient elongate member (10); walls (e.g. at 11, 12); slit (e.g. between 11 and 12); and a closed end (at 18'). Figs. 1-8.

Regarding claim 11, Frechtmann already includes this feature in that Frechtmann's device is inherently variable in length.

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 5-6 and 12-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Frechtmann.

Frechtmann discloses the invention substantially as claimed including the material being cork, since Frechtmann already teaches that the material is flexible, organic, synthetic, plastic material which encompasses cork. See c. 2, ll. 8-13. However, if it is argued that Frechtmann lacks this feature, then it would have been obvious to the ordinary artisan at the time of the instant invention to provide the device of Frechtmann with the material as claimed for resilient covering of the blade, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPO 416.

í

Regarding claims 12-18, Frechtmann discloses the invention substantially as claimed except for the elongate member being two and pin and socket joints. However, Frechtmann already teaches a pin and socket joint in the form of the wire (17) running through the associated socket (15). Moreover, it is obvious to one of ordinary skill to separate a given length of the blade guard into two when needed for a specific desired lengthy, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art. *Nerwin v. Erlichman*, 168 USPQ 177, 179.
